- C. All work is to be accomplished in compliance with these plans and specifications. All changes must be approved in writing by Local Infusion or the owner's representative. All costs incurred by Local Infusion or the owner's representative as a result of unauthorized changes are the responsibility of the individual(s) making the change.

Section 01010 - Summary of the Work

- A. References and Definitions

 - 2. A Subcontractor: Is a person or entity who has a direct contract with the Contractor to perform any work at the site. The term Subcontractor is referred to as if singular in number and masculine in gender and means a subcontractor or his authorized representative. The Subcontractor does not include any separate contractor.
 - 3. Installer: Is the person or entity engaged by the Contractor or his Subcontractor of sub/subcontractor in the performance of a particular unit of work at the project site, including installation, erection, application and similar operations, as installer may be a subcontractor.
 - 4. In the Plans, Specifications, addenda, and other Contract Documents, the abbreviation "GCC" or "GC" or "TGC" is used. These shall be taken to mean the meaning of the term.
 - 5. The term "Owner's Representative" shall be taken to have the same meaning as Owner (as if singular and masculine.) The term Owner means the Owner or his authorized agent.
 - 6. The Drawings and Specifications are complementary each to the other and what is called for by one shall be as binding as if called for by both. However, the Drawings and Specifications shall be considered inseparable documents and Contractor shall consider both instruments in order to perform the work in accordance with their combined intent.
 - 7. In case of discrepancies in the Contract Documents, Contractor shall first consult with the Owner for clarifications, revision, or further action as may be required prior to starting work affected by the discrepancy.
 - 8. Dimensions shall govern over scale sizes, large scale or full size details over small scale Drawings, and Specifications over Drawings.
 - 9. The Contractor, Subcontractor and installers are cautioned not to scale drawings. Should a dimension not be known or shown, consult the Owner's Representative for advice.
- B. Project/Work Summary
 - 1. General: The work of this Contract involves and includes the construction of a new Local Infusion retail store in a leased space at the location specified in the title block. Local Infusion is referred to herein as, the Owner.
 - 2. Contract Documents indicate the work of the Contract, and related provisions of which may include, but are not necessarily limited to the following:
 - a. Existing site conditions and restrictions:
 - (1) Survey and Layout of Work. Contractor shall check carefully all levels and dimensions of the work. Any discrepancies in the information provided on the Drawings or found within the owner's survey shall be reported immediately to the Owner. Contractor will obtain and follow Landlord's construction requirements of no additional cost to the bids.
 - b. Requirements for Owner occupancy of the established date of "Substantial Completion" and prior to final completion of work of Contract.

 - b. Pre-purchased subcontracts for Contract, with subcontract amount included in Sum.
 - 4. Summary by Reference: Work of Contract can be summarized by reference to the Contract Instructions to Bidders. Supplementary Conditions, Specification sections as listed in the bound herewith, Drawings as listed in "Schedule of Drawings" bound herewith, addenda and modifications to the Contract Document issued subsequent to the initial printing of this Project Manual, and including, but not necessarily limited to, printed matter referenced by any of these. It is recognized that work of Contract is also unavoidably affected or influenced by governing regulations, natural phenomena including weather conditions, and other forces outside the Contract Documents.
 - 5. Abbreviated Written Summary: Briefly, and without force and effect upon Contract Documents, work of Contract can be summarized as follows:
 - a. The work includes construction of a retail store on the site as shown, doors, hardware, glazing interior finishes, and furnishings including architectural woodwork, floor finishes, acoustic ceiling, and a portion of the signage.

 - 6. The Owner will furnish certain materials and equipment. However, the work of this Contract includes certain support systems to receive and service Owner's equipment. These items will be summarized in the instructions to General Contractors, in limited fashion, but are also called out in detail under various sections of the work.

Section 01011 - Examination of Contract Documents

- A. Before submitting proposal, each Bidder should carefully examine all Drawings, Specifications, addenda (if any) and all other Contract Documents.
- B. Submission of proposal implies that Bidder is fully informed regarding all requirements of the Contract Documents, plus all site conditions. No additional compensation will be paid to the Contractor due to this failure to be fully informed regarding requirements of the Contract Documents.
- C. Protection and the safety of persons using the site, parking areas and existing facilities shall be paramount, as well as the non-disruption of essential services.

Section 01016 - Owner Occupancy

- A. The Owner reserves the right to take initial occupancy of the building at the earliest possible date, particularly with regard to delivery and installation of store fixtures, and merchandise. Depending on the progress of the general contractor's work, this may or may not create some inconvenience. The general contractor should anticipate this possibility. Claims for time delays and/or extra costs due to such inconvenience will not be allowed.

Section 01017 - Pre-Negotiated Orders

- A. General: Prior to date of Contract, and for purpose of expediting delivery and for other purposes in Owner's interests, Owner may negotiate costs or make other commitments to be indicated with suppliers of materials/equipment that may be incorporated into the work by Contractor. Those orders and commitments will be assigned to Contractor, and costs place in Contract Sum. Contractor's responsibilities are same as if Contractor has negotiated purchase orders, including responsibility to renegotiate purchases if necessary and to execute final purchase order agreements. Preoccupation of space by any Contractor or Subcontractor does not give him the right of priority to the space.
- E. When piping, conduits, ducts or other items are to run in the same general direction, elevation or location, the Subcontractors involved shall request the GC to arrange a conference to determine the proper allocation of the space or position.
- F. When work is to be installed above ceilings, adequate clearance must be maintained to allow for access, repairs, and removal of all devices. Each Subcontractor shall be responsible for protecting his/her installation from being blocked off by others. Should a conflict occur, he/she shall bring the matter to the attention of the General Contractor for resolution.
- G. Each Contractor shall be responsible for any layout associated with the performance of his work. Should a Subcontractor's work be subsequent to and contingent upon layout by another, he shall check said layout prior to proceeding with his work, reporting any discrepancies to the GC. Proceeding with the layout shall be considered as acceptance of the layout.

Sound engineering judgment should be used to assure adequate coverage.
- G. All workers should be instructed in the proper use of fire extinguishing equipment.
- H. No Contractor or Subcontractor shall endanger and/or damage any work by cutting, drilling, digging or other actions. No Contractor or Subcontractor shall cut or alter the work of other Contractors or Subcontractors without prior written approval by the Owner's Representative.
